- ☐ a DSL modem
- ☐ Router
- ☐ Web Server
- ☐ Firewall

- ☐ Cellular
- ☐ Dedicated leased
- ☐ DSL
- ☐ Router

- ☐ Congestion
- ☐ Convergence
- ☐ Synchronization
- ☐ Optimization

- ☐ a measure of the data carrying capacity of the media
- ☐ a method of limiting the impact of a hardware or software failure on the network
- ☐ a set of techniques to manage the utilization of network
- ☐ a state where the demand on the network resources exceeds the available

- ☐ Applications can be accessed over the Internet by individual users or businesses using any device.
- ☐ A business can connect directly to the Internet without the use of an ISP.
- ☐ Devices can connect to the Internet through existing electrical wiring
- ☐ Investment in new infrastructure is required in order to

- ☐ the internet
- ☐ A home LAN is installed without the use of physical
- ☐ New "smart" electrical cabling is used to extend an
- ☐ A home LAN is installed without the use of physical

Quiz 2

What is the Internet?

☐ It is a network based on Ethernet

☐ It provides network access for mobile devices.

☐ It is a private network for an organization with LAN and WAN connections.

☐ It provides connections through interconnected global networks

What type of network traffic requires QoS?

☐ Emails

☐ video conferencing

☐ Messaging

☐ Audio

What type of network must a home user access in order to do online shopping?

☐ Congestion

☐ Convergence

☐ Synchronization

☐ Optimization

A method defined in a superclass is redefined in a subclass with an identical method signature is called

☐ a measure of the data carrying capacity of the media

☐ Dynamic binding

☐ Late binding

☐ Method overloading

A network administrator is implementing a policy that requires strong, complex passwords. Which data protection goal does this

☐ data confidentiality

☐ data integrity

☐ data redundancy

☐ access

Which statement describes the use of powerline networking technology?

☐ the internet

☐ A home LAN is installed without the use of physical

☐ New "smart" electrical cabling is used to extend an

☐ A home LAN is installed without the use of physical

Quiz 3

Which IPv4 header field is responsible for defining the priority of the packet?

traffic class differentiated services Web Server Firewall

What IPv4 header field identifies the upper layer protocol carried in the packet?

Which field in the IPv4 header is used to prevent a packet from traversing a network endlessly?

Time to live

Sequence

Optimization

ipv6

Which expression accurately defines the term bandwidth?

SVI

LAN

Telnet

DSL

What is one advantage that the IPv6 simplified header offers over IPv4?

Smaller sized header

Smaller size source and destination IP address

efficient packet handling

little requirement for promoting checklist
